SUMMARY

I am a technologist, UX/UI Designer, and Full-Stack Engineer with a passion for crafting powerful yet elegant user experiences through digital design and software development.

Driven by a desire to create accessible, user-friendly experiences, I leverage AI, automation, and integrations to develop innovative digital solutions.

SPECIALTIES

- API Systems Integration
- Automation Processes
- UX/UI Component Design
- Widget Development

WORK EXPERIENCE

Full-Stack Engineer, Portland Trail Blazers

- **Rip City Rewards** - Designed, prototyped, and built a full-stack application widget for custom partner tickets, optimizing workflow and functionality.
- **Single Game Tickets** - Implemented an offer addition feature for the Single Game Tickets page, handling both backend (API, database) and frontend development.
- Developed Internal Ticket QA Application for Internal client testing with UI compoments.

Digital Designer + Developer, Covideo

- Utilized React and GatsbyJS to develop Covideo's Dealer Services website.
- Designed and developed over 300+ branded video landing page for clients across automotive, education, and agency sectors.

Web Designer, Bevy

- Designed over 30 Figma website prototypes instances for
- clients such as Twitch, Hubspot, and Tiktok.
- Automated design workflow to streamline prototype creation.
- Developed custom website solutions and features for clients.
